Load the VBA code as described in the manual. If the record load fails, make sure you have the latest version of Autocad. For the folder structure, I suggest to: - C:\Tasc\Testing_Directories\ExportVBA_CAD.bat - C:\Tasc\Testing_Directories\ExportVBA_ARC.bat Execute one of the Autocad batch files from the command prompt. **Notes:** - You can also run the batch files from the start menu shortcut. - One of the batch files would start a CAD application and start loading the VBA, the other batch file would start the CAD application, close it and start loading the VBA. All of the above would start the CAD application, wait for you to finish the settings and finally close the CAD application. You may need to press and hold on the Windows icon at the top of the screen to have the CAD application and the VBA loading process in the background (not visible). The files can be found here: [
