It won't automatically run in the background thread. You need to use Task.Run to run the task in another thread. private void mainWindow\_Loaded(object sender, RoutedEventArgs e) { string file = "/C/Program Files/blah.blah"; Task.Run(() => ReadFile(file)); } private void ReadFile(string file) { // The following code should be inside the task // The "file" is the argument to the task Task.Run(() => { Task.Factory.StartNew(() => { // Do something... }); }); } Q: Most efficient order for marking specific posts as not spam in EE I want to be able to mark certain posts (specific post categories) as "not spam" so that they don't get added to the spam feed.
