
Make A Fake Skype Call Picture

this trick is cool, just try it to fool yourself. frndsi will give you a link where you can download manycam. First of all, you need to download and install polycometon, but before you can download, you need to install polycometon. Once installed, you can move on to installing multiple cameras. Select webcam settings from the top menu. From there, you can launch any camera you want to launch. I'm going to use "Skype" as an example, you just have to choose which camera you want to use. After the installation is complete, select any video stream.
