Lol, no way you're getting that. Its plain and simple, the person that left you that quote is a complete FREAK. TPVplus Elite version is a completely new version that is worth a try. I have tested it for you. There are two new nodes added. (Every node is worth its 1000's of price). There are two new heroes added. (Even more insane xp reward). The new price/customer support is very nice. Don't get me wrong, but this edition ain't new, and is just a nightmare for the cash shop. The flyaways add and spense add modes are still there and no worries about spens. The xp rewards are still the same as always, but this version comes with a very nice "new" add mode and a new spens mode. The new modes are fun with a single added bonus. Also, worth to mention, the new add mode still doesn't affect ads, really handy. At the end, the game is still grindy and a bit boring in some maps. But it has some nice and fun added values, mainly the new add mode. I have no doubt in my mind that this could be worth trying. I think its worth a try. But if you are, i strongly recommend you to play in the normal version. I will edit if i find some negatives, or if someone finds anything better. Don't waste your time with that edition. The background description provided herein is for the purpose of generally presenting the context of the disclosure. Work of the presently named inventors, to the extent the work is described in this background section, as well as aspects of the description that may not otherwise qualify as prior art at the time of filing, are neither expressly nor impliedly admitted as prior art against the present disclosure. In certain applications, it is desirable to maintain precise positional control of a work implement relative to a vehicle or other structure. For example, when working with high-value or dangerous goods, it may be undesirable to have a work implement that is not precisely aligned or positioned relative to a vehicle. With respect to a crane, for example, it is desirable to control the position and angle of a bucket relative to the crane. Thus, a positioning system is used to sense the position and orientation of the bucket relative to the crane and provide position 82138339de
