Can help you keep track of each financial transaction made by your company easily and quickly and gather the needed financial documents and reports quickly and accurately. such as the small cap and the large cap funds. The two most popular funds in this category are the Vanguard FTSE Emerging Markets ETF (VWO) and the FTSE China ETF (FXI). These two ETFs (VWO and FXI) provide a way to exposure to an international emerging markets index but avoid the risk associated with investing directly in these companies. VWO tracks the FTSE Emerging Markets All Cap Index and FXI follows the FTSE Developed Markets China 20 Index. ETFs in the large cap funds category are attractive to investors who desire exposure to the large cap or mid cap companies within the ETF's underlying index. The most popular funds in this category are the Fidelity Spartan Large Cap ETF (SLF), Vanguard FTSE Developed Markets ETF (VDE), and the FTSE All-Cap Europe ETF (FXF). These ETFs are small cap based which make them a good choice for investors looking for mid cap exposure but at a cost comparable to a broad market ETF like VEU. ETFs in the small cap fund category are attractive for investors seeking diversification. The two most popular ETFs in this category are the Vanguard Small Cap ETF (VSS) and the FTSE Developed Markets Small Cap ETF (FXS). These two ETFs (VSS and FXS) both track the FTSE Developed Markets Small Cap Index and provide a way to access the companies within that index. An ETF investor is subject to the fees and expenses of the ETF where the underlying fund is invested. An important consideration when choosing an ETF is to assess the underlying fund's cost. One way to calculate the costs associated with investing in an ETF is to divide the cost of the underlying fund by the number of shares held in the ETF. When looking for cost, one must keep in mind the expense ratio ("ER") or fee. The fee or expense ratio includes the cost of the shares in the fund and the operating expenses of the fund. The cost of the underlying fund (the expense ratio) is likely to vary by ETF according to the type of fund and the size of the underlying pool. Evaluating the costs of each ETF will provide an investor with an apples-to-apples comparison of the costs for each fund to the
