Recently, I downloaded an MK2 ROM patch for KHoC and did a save... And today, I loaded that save and went to play... Then, I started getting weird graphics. The player looks like this : The graphics are glitchy and they look like this : The monster graphics are like these : The only way I can get the graphics back to normal is to reload the game and load my save. I don't know if this has anything to do with the file "BOOT0.exe" that is a binary game executable associated with the MK2 ROM patch but I have been getting this issue for a while now on the same PC. Can anyone else get it and maybe help me figure out what is causing it and what I can do to fix it? Thanks, Nixx Ryukishi07 #38 Posted 06 December 2010 - 11:59 AM Ryukishi07 Members 6,604 posts Gender:Male Location:Pasadena (Locked) Can anyone else get it and maybe help me figure out what is causing it and what I can do to fix it?
