It was the greatest crisis in the history of ancient India. Religion was influenced by a variety of other religions at that time, and the cost of Buddhism has gradually declined, which has also caused the decline of Buddhism. Buddhism was preserved by a few followers, but the vast majority of practitioners gradually abandoned the religion. Some people still make sense and continue to preach Buddhism, but as the world's greatest religions, it is a professional challenge and is not a game. In addition to the obvious economic reasons, a huge number of ethnic factors and class differences also lead to the reduction and decline of Buddhism. The main religions in ancient India were Buddhism, Hinduism and Jainism. However, due to the religious, social and economic interrelations, they have gradually become the differences between them. Historically, Buddhism is the main religion in India, and the Indian people who are proud of being Buddhists have more influence in India. 【Rules of Playing】 1. May 10, 2009 Verified purchase: Yes | Condition: New One of the best games to come out of Japan for DS. The story was fantastic and the gameplay was also great. Graphical worth a 10 but for being on a DS I expected something a little better. That being said, it's a game you should play but it's not the greatest on the DS. Would recommend for people not on DS though.Q: How to make A nested IFelse statement
