NEW Experimental Action - a free-roaming tech demo to show the direction of the next few months. I used to make demo but I learned that they are really too hard to make on the PC version because there is no integration in it between visual parts and audio and programming. So I am looking for a best-practice model here. Will only be available to PC users.

What's new in RPG Maker MZ - MV Enemies - Character Sprites:

by Gal Ovesey Jewish tradition holds one event in the exile of the first Jewish people to be particularly memorable. Imagine 60,000 men, women and children fleeing their homes through snow, then on foot or on ox-drawn wagon to the promised land. You have the Exodus story. The Exodus story is unique for other reasons as well. While the Exodus story is the core of Jewish identity, and a central theme in Judaism's moral teachings, it's also an obvious puzzle. Just why should God's chosen people go through what seems to be an agony? Some of the problems have to do with our own traditions, dating back to Moses, but still fresh in the memory. Remember that our Bible is old (about 500 BC), and it purports to be a detailed, complete account of what the ancient author thought happened. But on some matters, it's simply a little flat. For instance, some scholars argue that Hebrews was written in the second century BC, rather than the fifth. "In this advanced age in which we live, where reason has replaced superstition, no one could remain unschooled and not understand that it is impossible for God to make history conform to human thinking." - Ariel Toaff In the second millennium BC, scientific studies were proceeding, not nearly as

advanced as now. The ancient Hebrew writers had no grasp of the notion of evolution, nor the historical laws governing the development of stars and planets. They had not the slightest understanding of the earth's geological processes, or the biological mechanisms of disease. In the absence of this knowledge, the writers of the Bible, upon reflection, were forced to imagine that the biblical story was true "out of their own logic" (as one scholar puts it). Ever since then, scholars have noted the deficiencies in what we have as a story about the exodus. As one scholar puts it, Moses' story "was an amalgam of fabrications inserted into a framework resting on a legend." As a result, it was clear from the beginning that the Exodus story was not myth (what Moses' contemporary audience believed). It couldn't be. Otherwise it would be no more worthy than the stories of the Argonaut adventures. Myth, when it was invented, sought to mold a pattern of behavior and ideas into history. This is very different than what an article of faith seeks to accomplish.
