### Photoshop CS6 Crack+ For Windows [March-2022]

The following sections offer tips for using Photoshop with a basic understanding of the program. Preparing for work Before you get to the actual editing of images, get comfortable with Photoshop's workspace. Try out the following steps: Create a new document. Place the cursor on the desktop or in your image. Choose Window⇒Workspace. Click the Open Workspace Image button. In the workspace shown in Figure 2-1, click the Select tab to see the highlighted tab at the bottom of the screen that displays the selection tools (refer to Figure 2-1). Click an icon at the bottom of the workspace to modify its visibility. For example, if you want the Arrange tool, click the Arrange icon. Click to activate the tools on the Select tab. You see the tools in the order they appear at the top of the workspace, where you click to activate them. (See the later section "Adjusting tools options" for more on using the tools.) Click the Preferences button in the upper-right corner of the workspace. You see the workspace preferences that control your workspace's size and the color scheme. Click the Dummy Page button. In the dummies window shown in Figure 2-2, select the page you want to display as the Workspace Preview. Click OK. Your workspace image is displayed on your page. Photoshop's workspace settings are stored in the preference files. The default settings are usually fine for most users. If you prefer to modify the workspace, click the Preferences tab to view the workspace settings. You can choose which preferences to use with the Dummy Page. \*\*Figure 2-1:\*\* Use the Select tab to view the selection tools. \*\*Figure 2-2:\*\* After you select a page in the dummies window, the page and its settings are stored in the workspace preference file. Photoshop has a default workspace size and color scheme. You can modify the workspace and workspace preferences (covered in the next section) to ensure that your workspace is big enough to work comfortably or to change the color scheme. If you want to see the settings you've modified, choose Edit⇒Preferences. You see a dialog box, as shown in Figure 2-3. You can also set which preference files to load from your Favorites folder. Select a check box from the Load from drop-down menu
