Update I tried the first option. It doesn't seem to be working. I get a message saying "not enough memory for displaying, streaming, or handling content". Also, does anyone know if this is appropriate for use as a podcast? A: Kodi has the notion of channels, which will play a sequence of videos/audio. For example, you could create a channel called "Chuggington" which would play the first 5 Chuggington videos, and then delete that channel. The Fed is about to purchase more US Treasury securities for the first time since 2008, but many are worried this might be a sign that we're headed for a recession. Here are some facts about T-Bills the Fed is buying that you may not know. One of the largest buyers of U.S. Treasury bills is the Federal Reserve. The Fed purchases T-bills by making loans with the money it creates out of thin air. When it does this, the Fed adds these new T-bills to its balance sheet. Eventually, the Fed sells these T-bills back to the Treasury and the money is put back into the economy. In the summer of 2008, the Fed bought a lot of T-bills and the proceeds were used to bail out the banking system. This is one of the reasons for the current recovery. In October 2008, just a few months after the bailouts, the Fed purchased T-bills for the first time since 2008. This is when the U.S. economy entered a recession. Since the U.S. economy recovered from the recession, the Fed has purchased T-bills every month in a pattern I refer to as the "Fed Loop". This has contributed to the U.S. economy outperforming most other developed countries. Another reason the U.S. economy is not in a recession is because the Fed has been lowering the interest rate it charges banks to borrow money. This means banks are charging less interest to borrow money and therefore they're investing in the economy. Since banks borrow money from the Fed, they're also borrowing from the banks that are themselves borrowing money. Banks are making money off of bank money which is money borrowed from a bank that is borrowing money from another bank which is borrowing from
