## Construction Simulator 2015 Gold Edition Cheats

one of the most important aspects of construction simulator 2015 gold edition is the fact that it gives players the option to complete their own construction company and thus own their own construction site. this is not to say that you cant start your own business but rather that it is completely up to the players preference as to what they want to do with their own construction company. the game offers many customisation options, from the company name, to the type of construction equipment you employ, to even the colour of the company logo. this degree of personalisation is a great way to make the game a more memorable experience. construction simulator 3 was created with several features that are unique to this game. the most noteworthy of these includes the ability to build a dream home in an open world environment. this is done by entering an office or villa that you have built. after selecting the size and layout of your home, you can then proceed to the next step where you can select the type of furniture you want in the house. the furniture options available are not only limited to your typical seating options, but also includes tables, televisions, sofas, a range of other items, and even a pool table. all of these items can then be placed in the desired location and when youve finished you can move to the next step where you can create and place landscaping around your new house. in this aspect of the game, there is more a sense of building a virtual home rather than a house in a sim that is actually based on a real world location. there is a downside to this option as it makes the in-game home a lot less customisable as compared to other more focused sims such as the sims. 5ec8ef588b
