## Visoft Premium 2011 REPACK

ViSoft is the premium choice for companies in the construction industry. More than 20 years of experience have gone into developing and maintaining it. We have played a major role in ViSoft for many years, and we know what our customers are looking for. We are extremely pleased with ViSoft. It offers our team and the customers direct access to every important information, especially when it comes to the individual component of the renders or videos. It allows us to create interesting 3D models very quickly and provides excellent visualisation options for our customers. ViSoft makes sense for almost any project in the construction sector, because it has been tested and refined over the years. It is easy to use and provides fast access to all information, no matter which product is being used to create the images. It is also relatively inexpensive, which is an enormous advantage for our customers. ViSoft ist gratis for Tiltan, DomuS3D and Spark Vision. You can easily use any of the graphic primitives (editable architecture, textured, carpet, stucco or brick) that are included in your standard package. You also have the choice of acquiring products and materials individually, which is a great boon. The materials in ViSoft, with the exception of exterior materials, are of an extremely high quality. Most of the materials are measured in mm. Some can even be used in radioactive facilities and biological laboratories. ViSoft Premium is available in 14 different languages. In the past, we have been able to enter into a contract with the association for Romanian and Hungarian builders. There, the ViSoft programme is being used by thousands of firms, making a significant contribution to the development of the construction industry.
