On the first QTabWidget I have a QGroupBox that I use to show an error message, and it works, the problem is that when I want to show a QMessageBox using the same code, it

fails and I can't debug it, but it just shows me the QMessageBox once, and then stops showing. This is the NavWindow class: #include

The penguin population here is pretty low. It is not a popular destination for people to go. It's about 3 hours drive from Auckland where we live. We visited it last year too. Funny thing is, people love to go to this place. It was so crowded where we could hardly find a spot to park our car. In the past 2 weeks, we haven't been able to find a parking spot to park at this place. There are approximately 3000 to 5000 penguins at this place. They do rest in large numbers on a particular day, which is in the middle of a day and that day we were there. There were a few people there but it was not too crowded. To me, this place is beautiful. If you have chance to visit, you should not skip it. A-rob. 04aeff104c
