- The Pmo Browser is a lightweight software application whose purpose is to help you navigate on the Internet in a simplistic workspace. - User interface You are welcomed by a plain design that embeds only a few configuration settings. A help manual cannot be found in the package but you can tweak the dedicated parameters on your own because they look easy to work with. - You cannot surf on the Internet in a multi-tabbed environment so you are restricted to opening a single website. Basic web browsing controls are implemented for helping you jump to the next or previous website. - Web browsing capabilities The application gives you the possibility to check out a history with all accessed websites, create bookmarks with your favorite webpages, print the information, as well as send links via email using your default client. - What's more, you are allowed to view the source code, get a list with currently opened webpages and easily switch between them, and delete history and bookmark items. - Tried and tested The application has been tested on various hardware platforms and browsers. - Performance Pmo Browser loads pages pretty quickly. However, it eats up CPU and memory resources so the overall performance of the computer may be affected. On the downside, the web browser becomes unresponsive. Supported Platforms: - Linux - Linux Debian - Linux Ubuntu The Pmo Browser is a lightweight software application whose purpose is to help you navigate on the Internet in a simplistic workspace. User interface You are welcomed by a plain design that embeds only a few configuration settings. Meta-Menu is a free menu system for your web browser. Powered by popular browsers such as Chrome, Firefox, Internet Explorer and Safari, Meta-Menu makes it very easy to integrate your favorite website's menu items directly into your browser. In other words, with Meta-Menu you can directly access, view and control your favorite web pages by simply clicking on the corresponding menu items. Meta-Menu makes this process very easy and convenient, while preserving the look and feel of your desktop browser. Features: Customizable design With Meta-Menu you can easily customize the look and feel of your browser to match the look and feel of your desktop browser. You can also easily change the colors and font sizes of the menu items and any additional text elements. Keyboard shortcuts Meta-Menu has an extensive set of keyboard shortcuts for every menu item. By default, you can assign shortcuts to the most commonly used menu items. For example, by assigning the Ctrl+1 shortcut to view the "page one" menu item, you can access that page directly from the browser. Create favorites Meta-Menu also enables you to create new favorites with menu items. You can add an unlimited number of favorites. When you open the favorites list, you can easily view and control all favorite pages by simply clicking on the corresponding menu items. Integrated download manager With Meta-Menu you can easily start or stop a downloads right from the browser, without having to leave the page. You can pause the current download or resume it at any time. You can even remove completed downloads. Download files directly to your computer Using the built-in download manager, you can download a number of files to your computer without having to leave the browser. You can also download a number of files in parallel from a single webpage. Import and export settings Meta-Menu makes it easy to export and import the configuration settings. You can export your favorite menu items and create them on a new computer. You can even import the favorites list from other browsers. Introduction CargoFX is a launcher/filler/resource scanner designed for corporate users. It can download and load resources (files, scripts, images, sounds, etc.) from various locations, creating a folder structure for you. It's very easy to use, and it's Free. What's New In?

Pmo Browser is a lightweight software application whose purpose is to help you navigate on the Internet in a simplistic workspace. User interface You are welcomed by a plain design that embeds only a few configuration settings. A help manual cannot be found in the package but you can tweak the dedicated parameters on your own because they look easy to work with. You cannot surf on the Internet in a multi-tabbed environment so you are restricted to opening a single website. Basic web browsing controls are implemented for helping you jump to the next or previous website. Web browsing capabilities The application gives you the possibility to check out a history with all accessed websites, create bookmarks with your favorite webpages, print the information, as well as send links via email using your default client. What's more, you are allowed to view the source code, get a list with currently opened webpages and easily switch between them, and delete history and bookmark items. Tests have shown that Pmo Browser loads pages pretty quickly. However, it eats up CPU and memory resources so the overall performance of the computer may be affected. On the downside, the web browser becomes unresponsive. Bottom line In conclusion, Pmo Browser comes packed with a basic suite of features for helping you access websites. On the downside, it does not offer support for advanced options for allowing you to browse on the Internet in a private mode, install plugins and themes, set the homepage, sync data across multiple devices, and automatically fill out web forms, just to highlight some professional functions. Pmo Browser was reviewed by Caroline Spierer, last updated on October 1st, 2014 Spin-switch, multiferroic and dielectric materials constructed from the liquid crystal hydrazone. Nanostructures of the liquid crystal hydrazone, 1,4-bis-(5-chloro-1H-imidazol-2-yl)-benzene bis-4-bromobutyl ester (C₆H₆Cl₁H-1,4-di-n-butylimidazol-2-yl ester, denoted as C₆-1,4-di-n-butylimidazol-2-yl hydrazone, abbreviated as H4L) and 1,4-bis-(5-chloro-1H-imidazol-2-yl)-2,3-di-n-butyl-benzene bis-4-bromobutyl ester (C₆H₆Cl₁H-2,3-di-n-butyl-1,4-di-n-butylimidazol-2-yl ester, abbreviated as C₆-2,3-di-n-butyl-1,4-di-n-butylimidaz

System Requirements For Pmo Browser:

Minimum: OS: Windows 10, Windows 8.1, Windows 7, Windows Vista, Windows Server 2003 or later CPU: Intel Core i3 (2.3 GHz), Intel Core i5 (2.5 GHz), Intel Core i7 (2.5 GHz), AMD A-Series, Intel Celeron, Intel Atom, AMD Athlon, AMD Phenom Memory: 4 GB RAM Graphics: DirectX 9 graphics device with 1GB RAM, with a minimum resolution of 1024x768 (screen resolution for HDTVs).
