EsCalc Crack+

esCalc is a comprehensive application designed to provide you with a set of advanced tools for managing complex data and generating analytic reports, while also keeping the basic functions of any spreadsheet software. With its user-friendly, Excel-style interface, esCalc does not pose any problems, even to ordinary users. It presents complicated data computing processes step-by-step, in a simple way, enabling you to use SQL statements, scripts and other similar items for computing, through visual operations such as group, sort, filter, join and so on. The displayed result is easy-to-understand, which means that users no longer have to deal with abstract data structure. The application provides enhanced tabular data calculation functions, thus helping you adjust expressions and formulas, while keeping in mind business relationships. Joining or merging groups of data, sorting, filtering and data migration operations do not depend on the positional relationship, as it is the case with common spreadsheet programs. esCalc can import data from Excel, text or database files and quickly generate professional-looking charts. It features exporting and printing capabilities, page breaking and advanced reporting tools that enable you to create tables and graphs. Multi-level data structuring means that rows can be associated with each other, while the data grouping tools enable you to perform various operations to a multi-level data set (such as joining data from multiple files). Data with the same business priority and background is stored in 'homorows', which are groups of data that are processed simultaneously. It provides support for calculating subsets, intersections, unions and more. esCalc is a visualized data computing tool that can perform integral calculation on business data and carry out complicated tasks progressively and intuitively. It is a modern business tool that tries to handle complex computations, in order to increase efficiency and productivity. esCalc Information: esCalc is the best choice when it comes to managing complicated data sets, even for those who are familiar with the operation of business software. esCalc is a spreadsheets application designed to let you calculate your own data and create reports, while you're still immersed in it. Thanks to its flexibility, esCalc does not need any kind of programming knowledge. Main features of esCalc: • Modern Excel-style user interface • Strictly Excel-compatible • Covers all common operations of spreadsheets • Advanced data processing functions • Powerful graphic tools • Complete support for data migration and record linkage
