

Doc To Jpg Converter Crack Keygen For (LifeTime) Free Download

Doc To Jpg Converter Free [32|64bit]

Doc to Jpg converter Crack is an application which you can use to convert documents in the DOC, RTF or TXT format to image files with the BMP, JPG, PNG, TIF, TGA or PCX extension. The interface of the program is very plain and easy to navigate through. Documents can be imported via the file browser or "drag and drop" method. Batch processing is supported. In the list you can check out the source path of each document. So, all you have to do is specify the output destination and image format, and proceed with the conversion process. In addition, you can access the "Options" area to configure image settings when it comes to the image size (e.g. letter, tabloid, legal, executive). But you can also change the unit type (inch or millimeter), orientation (portrait or landscape), margins, resolution and colors. The image converter takes up a very low amount (which is barely noticeable) of system resources and manages to quickly finish a conversion task without freezing, crashing or popping up errors. The images, tables and text layout are maintained at a very good quality. On the other hand, you cannot preview results and no message pops up at the end to tell you if the task was a success or not. Putting aside the simplistic interface, the trial version displays a watermark on the output version. Even so, we strongly recommend Doc to Jpg converter Crack For Windows to all users who prefer a straightforward application that delivers excellent results. Read more about Doc to Jpg converter... Doc to Jpg converter is an application which you can use to convert documents in the DOC, RTF or TXT format to image files with the BMP, JPG, PNG, TIF, TGA or PCX extension. Doc To Jpg Converter Crack Activation Code Download

The Doc to Jpg converter is an easy-to-use utility which enables you to convert MS Word, Excel and PowerPoint documents to JPG format. When you launch this tool, you will see the following window: The first step you have to take is selecting the "Input type" and "Output type". You have several options to choose from, such as "Convert to BMP", "Convert to JPG", "Convert to PPM", "Convert to PNG", "Convert to TIF" and "Convert to TGA". The application will take care of all settings for you and will only ask for confirmation. In the "Image" section, you can select the resolution you want for the image (full size or thumbnail). The unit type is also customizable. If you choose to apply the vertical format, you will have to click on the radio button in front of "Vertical". The "Options" area offers you to configure the image size (letter, legal, tabloid, etc.), the orientation (landscape or portrait), margins and the unit type. Once the conversion is done, the final version will appear in the list of all files which were converted. However, you will only be able to see the output path. In order to preview your file, you have to open it directly in a third-party application. Doc to Jpg converter is an easy-to-use utility which enables you to convert MS Word, Excel and PowerPoint documents to JPG format.
