Notepad Enhanced Description is a WordPad-like editor for Windows, and it's powered by the small 4.0.x programming platform. It's a very useful text editor for those who wish to create simple documents, edit web pages and help with simple coding. As you may have guessed, this program includes some features that are offered by Notepad and most of the elements that you can find in the built-in editor are present. There's a large list of most of the standard editing features that you might want in your text editor. In particular, you can: Create, open, and save files in the Microsoft Notepad format Delete words, lines, sentences, or paragraphs Add new text, pages, or entire sections Add images, links, and bookmarks Add formatting (such as fonts, italics, bold, and so on) Find and replace existing text Insert, edit, or remove bookmarks Insert tables Insert and format links Spell check Split a document into multiple files Text color options Undo and redo changes All in all, Notepad Enhanced Description is a text editor that includes an impressive list of features. Extend your capabilities Another handy aspect of this little program is that you can add some extra features to its standard list. This way, you can have some extra settings for your formatting that might not be included in the standard interface. You can also use Notepad Enhanced Description to create programs for your PC, which makes it a very versatile tool. All you need to do is use its 'Create program' option, insert settings, and press 'Run'. You can use the resulting program, or any of the files that were generated, in other programs. In terms of its overall functionality, the free Notepad Enhanced Description is a very capable and useful text editor. If you need a simple text editor, this is a great choice that will meet your needs.

Ccleaner Classic Uninstaller: Ccleaner Classic is an application that is aimed at cleaning your PC, removing junk files, enhancing the performance of your system, and protecting you from online threats. It's pretty simple to use and there's no registry or user interface modifications involved. You just have to start the application, choose the tool that you'd like to use, press 'Go', and let it do its thing. It'

What's New in the Veodin SlideProof?

A proper PowerPoint presentation must always be neat, stylish and appealing to ensure a successful impact. There are cases where a well put together presentation can make your pitch much more successful. For it to be so, you need to make sure that there are no formatting errors or inconsistencies, among other things. Veodin SlideProof is a robust little tool that was designed to help you proof PowerPoint presentations so you won't have to worry about someone spotting mistakes while they are being run. Straightforward and intuitive Similar to most Office add-ins, Veodin SlideProof is easy to install and use. Once it makes its way into PowerPoint, it creates a new tab in the ribbon from where you can quickly access it and its features. There's nothing complicated at all when it comes to using it. You get a top toolbar from where you can choose to analyze the current slide or the entire presentation and a side pane that provides a details about identified issues and a quick fix button. As far as configuration goes, things are kept to simple, as you can choose how to sort warnings and their level. Additionally, you can opt to view warning details and select a different ribbon location for the plugin. Perform proofing with one click A neat thing about Veodin SlideProof is that once it finds any inconsistencies, it allows you to fix them with one click. Found issues are presented in categorized lists and you can choose to fix everything from a specific category or go through them and pic individual problems to eliminate. Changes that occur once you click the 'Fix' button are immediately shown in the presentation and if it turns out that it was better when the mistake was present, Veodin SlideProof

provides an 'Undo' button. Practical and handy To sum things up, Veodin SlideProof is light on your system's resources, it's quick and easy to work with and most of all, it really offers a helping hand when it comes to proofing PowerPoint presentations. DESCRIPTION: A proper PowerPoint presentation must always be neat, stylish and appealing to ensure a successful impact. There are cases where a well put together presentation can make your pitch much more successful. For it to be so, you need to make sure that there are no formatting errors or inconsistencies, among other things.
